SUBJ: Operational Summary
Air Weather Reconnaissance Squadron Provisional (III)

1. The enclosed summary of Weather Reconnaissance Squadron Provisional (III) operations at  represents the findings, results and recommendations gained from 1072 hours of flying experience. A special effort was made not to base our conclusions, findings and/or recommendations on single experiences but from systematic planned mission results derived where possible from controlled conditions and procedures.

25X1A6a

2. Since the equipment involved represents the most advanced developments in this field, and other units will follow, it is hoped that this summary will help eliminate part of the costly trial and error mistakes we made and new units are plagued with.
